

Sustainable Energy Solutions
is a niche consulting firm
specialising in energy procurement

We provide a suite of energy solutions to medium and large business customers across all industry sectors.

 sustainableenergysolutions.com.au

A team of experience

For over 14 years, we have been helping our clients to take control of their energy cost by securing competitive electricity and gas contracts for their business or site anywhere in Australia.

Our team of experts can also advise on carbon strategy and energy efficiency projects such as solar, LED lighting and Power Factor Correction. Our goal is to help businesses reduce their energy consumption, greenhouse emissions and achieve sustainable long-term savings.

ENERGY PROCUREMENT

We work with our clients every step of the way including how to interpret their energy data and how to sign a contract so that it is accepted by the retailer within the validity period. Our experienced Client Relationship Managers oversee your portfolio throughout your contract duration whether it's electricity or gas. We work hard to understand your approval processes and to keep our clients up to date with any market movements that can impact their business.

Our energy procurement service includes:

- Energy market tracking and industry knowledge
- Electricity and gas procurement/purchasing
- Competitive energy tendering
- Negotiating energy contract terms and conditions
- Energy cost analysis
- Budget preparation
- Securing an energy contract
- Full energy portfolio management across all your sites

ENERGY EFFICIENCY

Locking in a competitive contract is an important step in an organisation's energy management journey. However, as energy is a volatile market, it is important to explore energy saving opportunities to help reduce your energy consumption and future proof your business against rising energy cost.

We can assist with:

- Identification of opportunities including solar power, LED lighting, Power Factor Correction and voltage optimisation
- Energy audits and carbon strategy
- Feasibility analysis, eligibility for rebates and payback periods
- Competitive sourcing and analysis of offers
- Partnering with the right energy efficiency supplier
- Stakeholder engagement and board approval

DATA MANAGEMENT AND REPORTING

Your Sustainable Energy Solutions' Account Manager can discuss your data management and reporting requirements and recommend a range of suitable solution to meet your business needs. SES Bill Clarity simplifies the complex utility spend management process for medium to large businesses by automating manual processes and providing complete control over their full bill cycle.

We can assist with:

- Metering agreements and cost comparison
- Access to your retailers' online billing platform
- Bill validation and issue resolution
- Energy data monitoring
- Electricity and gas consumption reports
- Greenhouse gas emissions reports
- Energy data management and reporting

Why Sustainable Energy Solutions?

Market knowledge. We track the market daily to identify market trends and alert clients to market movements and timely negotiations.

Sector experience. We understand our clients' business and have experience across a range of industries including food and industrial manufacturing, aged care, retail, cold storage, logistics, media and telecommunications.

Experience with buying groups and large multisite portfolios. Sustainable Energy Solutions is experienced in negotiating competitive energy contracts on behalf of buying groups. Members have benefited from the savings received which have made a meaningful difference to their bottom line.
